Statement 7.1

As Incomes, distribution by classes

		in Trillion Rupees	as %
1	Wages	99.1	41.2
2	Profits/Mixed income	142.1	59.1
3	Production taxes less	-0.7	-0.3
4 = 1+2+3	Net value added	240.5	100.0

Structure of GDP

- Jayan Jose Thomas
- Indian Institute of Technology (IIT) Delho

Gross Domestic Product (GDP) = Gross Value Added (GVA) + Net Indirect Taxes (or Taxes less subsidies)
 Net Domestic Product (NDP) = GDP - Depreciation (annual charges on maintenance of capital, machines and buildings)

India's GVA, GDP and NDP in 2023-24, all at current prices

		in Trillion Rupees	as %
1	GVA at basic prices	274.1	91.0
2	Taxes on Products including import duties	33.5	11.1
3	Less Transfers (Subsidies on Products)	6.4	2.1
4 = 1+2-3	GDP	301.2	100.0
5	Depreciation	33.6	11.2
6 = 4 - 5	NDP	267.6	88.8

Statement 1.1

GVA at basic prices: Value added at the factory gate after paying the factors of production.

Now when the good or service enters the market, taxes will have to be paid.

What enters the GDP/GVA calculations in the case of a plate of food served in a restaurant.

The value added or income generated (for chefs, owner) at the time a plate of food leaves the kitchen is what enters the GVA.

On top of that, the bill we pay include GST (indirect tax here) as well. That food bill is what enters the GDP calculations.

GDP as expenditures

GDP = **C** (private consumption) + **I** (private investment) + **G** (consumption (C_g) and investment (I_g) by the government) + **E** (exports) - **M** (imports of goods and services)

		in Trillion Rupees	as %
1	C (Private Final Consumption exp	181.3	60.2
2	C_g (Government Final Consump	31.0	10.3
3	I + I_g (Gross Capital Formation	94.7	31.4
4	E (Exports of goods and services)	64.6	21.4
5	M (Less Imports of goods and ser	-70.9	-23.5

Statement 1.1

	Shares (%) in:		in thousand Rupee
Sectors	GDP	Employment	Value added
Agriculture and allied	18.2	41.5	191
Manufacturing	14.3	12.5	502
Construction	8.8	12.7	304
Trade and repair	10.6	11.3	412
Transport, storage	4.5	4.4	447
Hotels and restaurants	1.0	2.1	204
Information and communication	7.7	1.6	2037
Finance, insurance	5.8	1.1	2297
Real estate	6.5	0.3	10550
Professional, scientific, technical	0.5	0.7	322
Administrative and support	3.7	1.1	1537
Public administration and defence	6.0	1.6	1682
Education	4.5	3.3	599
Health	1.8	1.4	562
Other Services	1.1	1.9	260
Domestic Helpers	0.1	1.4	42
All Sectors	100.0	100.0	437

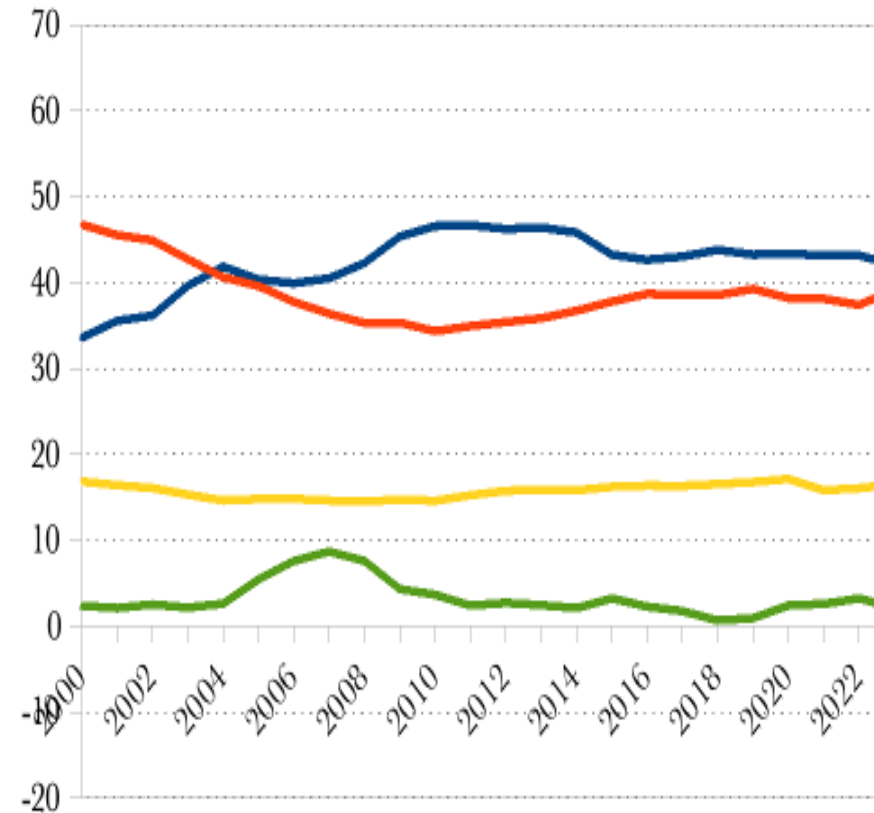

Sector-wise distribution (%) of India's GDP and Employment, 2022-23

(Sources: National Accounts Statistics (Gross value added);
PLFS data (Employment))

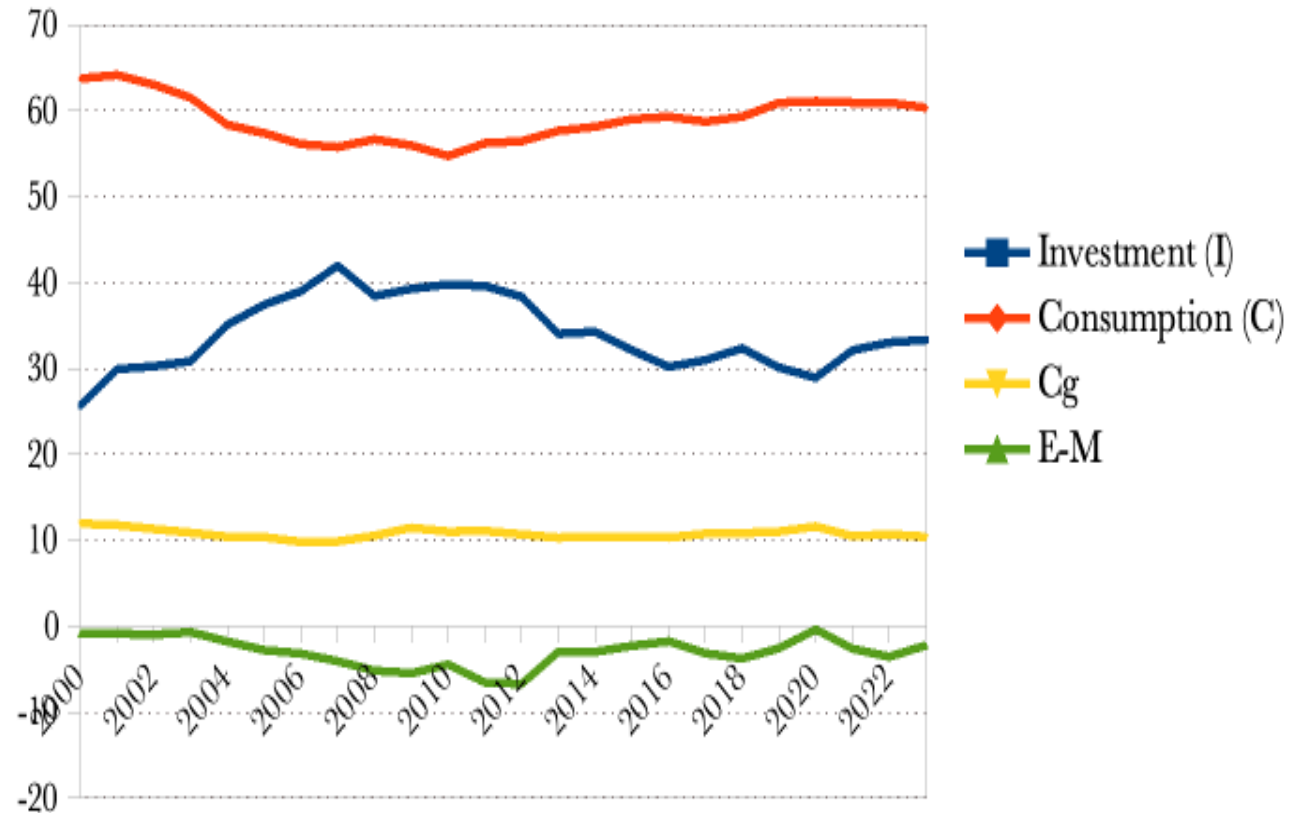

- We can calculate the value added (output – input) of each sector. This Table shows contributions to value added or GDP of the various sectors. Also the contributions of these sectors to country's employment. The last column reports value added per worker in each sector.
- Agriculture and allied activities employ 41.5% of India's workforce but its contribution to GDP is only 18.2%
